

PRESS RELEASE

COMAU AND REIS ROBOTICS SIGN A COOPERATION AGREEMENT TO PURSUE ADVANCED AUTOMATION PROJECTS ACROSS MULTIPLE INDUSTRIES

- The agreement highlights the strengths of European technology excellence in advancing industrial infrastructure
- The companies will initially focus on sectors including shipbuilding, intralogistics, giga casting, battery production, heavy industry and critical infrastructure, in Germany, Italy and at a global level
- They will also explore new applications together

Stuttgart, March 25 – Comau and Reis Robotics have signed a cooperation agreement aimed at jointly developing and delivering advanced automation products and solutions for multiple industrial sectors through a coordinated technical and commercial approach.

The agreement signed today by Comau and Reis Robotics, respectively Italian and German companies, testifies to the strength of the European technology framework in advanced industrial development. The initiative brings together the complementary expertise and experience of both companies to design and deliver integrated complex systems that improve efficiency, flexibility, and scalability, with the initial focus on sectors such as shipbuilding, intralogistics, giga casting, battery production, heavy industry and critical infrastructure, among others.

The cooperation combines Reis Robotics' proprietary control technology, and multi-process automation with Comau's global industrial footprint and advanced automated solutions and robotics portfolio. A further element of the agreement sees Comau and Reis Robotics working together to identify and develop additional market segments and technical applications where their combined expertise can generate value.

*"Working together with Reis Robotics is an important element in our diversification strategy and a further demonstration of our pledge to bring advanced automation technologies to new sectors and applications," emphasized **Pietro Gorlier, CEO of Comau**. "The synergy that comes from uniting our shared expertise, allows us to pro-actively meet the evolving needs of the market as automation becomes an increasingly important strategic lever, and to enhance our presence in Germany, in particular, which represents a strategic market for us."*

*"The cooperation with Comau represents a strategically important step in strengthening our international business and expanding our capabilities in key industrial sectors," said **Uwe Eich, Managing Director of Reis Robotics**. "By combining our expertise in system integration and automation with Comau's global reach, we are well positioned to deliver efficient and scalable solutions to our customers."*

About Comau

Comau is a worldwide leader in delivering advanced automation solutions across diverse industries. Together with Automha, a fully owned company specializing in global intralogistics and warehousing automation, Comau is enabling companies of all sizes in almost any industry to unlock the full potential of automation, robotics, and digital technologies – and to increase their efficiency, flexibility, and competitiveness in rapidly growing markets. Comau’s portfolio includes products and systems for vehicle manufacturing, with a strong presence in e-Mobility, as well as cutting-edge robotics and digital solutions for a variety of industrial sectors, such as shipyards, food&beverage, logistics, pharma, and renewable energies. Comau also offers project management and consultancy services and has an internationally recognized training Academy. Automha develops intelligent, high-performance automated storage and retrieval handling systems that optimize efficiency and reliability across diverse industries. Comau and Automha are headquartered in Italy (Turin and Bergamo, respectively) and have an international network with 8 innovation centers and 14 production facilities in 12 countries, with more than 4,000 employees.

About Reis Robotics

Reis Robotics is a globally active automation company and a leading provider in system integration, headquartered in Obernburg am Main, Germany. The company develops customized automation solutions for key industries such as automotive, foundry, and metal processing. At the core of its systems is open robot control software, enabling the seamless integration of robotics, processes, and production systems. The portfolio includes handling and process automation as well as turnkey production solutions, supported by specialized robots and automation components for welding, laser processing, multi-process, and foundry applications, complemented by intelligent software for control and process optimization.

Founded in 1957, REIS Robotics combines decades of engineering expertise with proprietary control technology to deliver fully integrated automation solutions from a single source. Since July 2023, the company has been part of the family-owned industrial group Cocchi Technology and FAI Holding.
